REMARKS

The Applicants greatly appreciate the time that Examiners Patrice Winder and Thu Ha T. Nguyen spent with the undersigned patent attorney on June 2, 2004. The meeting was quite productive in advancing the present patent application. The Applicants further appreciate the time that Examiner Nguyen spent speaking with the undersigned patent attorney via telephone on August 20, 2004.

As discussed during the initial meeting, "one or more information providers" has been changed to "plurality of information provides" in the pending claims, to clarify the language. Also, the step of "storing the transmitted aggregated content at the client computer" (slightly modified from the Examiner's suggested language, in order to maintain proper antecedent basis) has been added to claims 14 and 22, to mirror the language of the other claims.

Additionally, several amendments have been made to the claim to overcome the rejections under 35 U.S.C. 112(2), as detailed in an Advisory Action mailed August 18, 2004. It is believed that the amendments address each and every comment set forth in this Advisory Action.

In view of the foregoing, and as discussed with Examiners Winder and Nguyen, the present patent application is now deemed to be in condition for allowance. Applicants therefore respectfully request allowance of the application. If the Examiner believes further discussion of any issue would expedite allowance, the Examiner is encouraged to telephone Applicants' undersigned representative.

Respectfully Submitted,
